

Inventory Management Solutions

A fully customized program to streamline your storeroom

Real life experience. Real life solutions.

An efficient inventory management system for your storeroom ensures that the right parts are not only available, but in service-ready condition. An *effective* system will reduce administration, maximize your labor and make your job easier. Whether you currently operate a facility storeroom or you're considering developing one, the specialists at Schaedler Yesco can help.

Your Custom Plan

The Schaedler Yesco Inventory Management System (IMS) is a fully customized inventory solution for materials and components right in your facility. As your partner, we will help you identify dead stock and duplicate supply to reduce inventory costs and administration. Our dedicated team will develop, organize, and launch your storeroom based on YOUR needs. Unlike services from other suppliers, we understand that one size *does not* fit all.

Saves Time and Money

Once your initial plan is in place, your dedicated Schaedler Yesco field rep will establish a regular schedule to review your storeroom. With each item barcoded and located to offer maximum efficiency, we will complete a full inventory and reorder product on your predetermined direction. You can change your inventory at any time quickly and easily. We can even help with parts remanufacturing to ensure availability of rotating spare components.*

**Ask about availability.*

What does IMS offer?

Program Element	Benefit to You
Schaedler Yesco manages storeroom inventory, reorders product, organizes material, removes dead stock, and provides reporting	Reduces storeroom labor allowing for redeployment in other areas
Condensed number of vendors & SKUs	Fewer POs and invoices reduces administration needs
Regular Just in Time deliveries and less inventory depth	Reduces overhead and carrying costs
Specialists available as needed (<i>data, automation, lighting, gear, etc.</i>)	Expertise in products and applicable solutions at your fingertips
Inventory reliability	Reduces downtime as critical items are never out of stock
Emergency Service 24/7	Quick response reduces downtime and mechanical failures
Independent, locally-owned company	Accessible support and fast solutions

Meet your KPI Goals

This system is more than inventory management. Many of your productivity key performance indicators can be traced back to the quality and availability of your parts and components. From staffing to downtime reduction to training and skills, we'll show you how you can affect your measurements through a well-planned, reliable storeroom.

Actionable Data

As the life of your machinery and facility changes, so will your storeroom needs. We provide actionable reports that help you work with those changes and maintain the reliable supply your maintenance team needs.

Improve productivity,
minimize downtime,
streamline processes
and reduce
storeroom costs.
