

Ocal PVC-Coated Conduit and Fittings

Designed to stand up to your most demanding corrosive environments.

- 3/4" thru 2" conduit, elbows, & fittings.
(other sizes available within days - call for details)
- Hot-dipped galvanized threads. Hot-dip galvanizing is the process through which the steel shell is dipped in molten zinc, causing the zinc to penetrate the steel.
- A full undisturbed zinc coating under the PVC coating, fulfilling the requirement of NEMA RN-1 regarding undisturbed zinc coating over the conduit.
- Meets the requirements of NEMA RN-1 without exception.
- UL Listed for UV resistance.
